

Amendments to the Specification:

Please amend the Specification by adding the following new paragraph just prior to numbered paragraph [0034] which begins at page 17, line 24 of the Specification:

“LNG product storage and shipping is also shown in Figure 4 which includes a LNG product storage facility 361, which receives product from lines 69 and 69' (sixty-nine prime) as shown. LNG product is then passed from LNG product storage facility 361 via a line 363 to a LNG shipping facility 365. At LNG shipping facility 365, the product LNG is typically shipped, as shown generally by arrow 367, by sea via a docking, transfer piping and the like to a transport ship, or the product LNG may also be shipped by land pipeline, both as generally known in the art.”
